OBJECTIVE

Recent computer programming graduate seeking an entry-level Junior Software Development role. I wish to use my knowledge of C#, Python, and software design to support software development processes. I am committed to collaborating with a team to streamline development cycles, optimizing performance and deliver high-quality code.

EDUCATION

George Brown College – Toronto, ON *January 2025 - April 2026*

Ontario College Diploma

Relevant Coursework: Data Structures & Algorithms, SQL, MYSQL

St. Jean de Brebeuf – Vaughan, ON *September 2018 - June 2022*

Ontario Secondary School Diploma

Awards: Ontario Scholars Award, Honour Roll

PROJECTS

Tic-Tac-Toe AI (*Minimax Algorithm, JAVA*) - March 2026

- Developed a game AI using the minimax algorithm to simulate optimal decision-making
- Implemented game logic and board evaluation to ensure competitive gameplay
- Structured code using object-oriented principles for maintainability

REGEX Tool (*C#, WPF*) - April 2026

- Developed a visual tool for generating, testing and understanding regular expressions

Technical Skills

- Proficiency in Python, C#, Java, HTML, CSS, JS, SQL, and ASP.net
- Object-Oriented Programming
- Scrum / agile workflows
- AI integration into workflows

Work EXPERIENCE

Deli & Grocery Employee / Cashier – Grande Cheese *August 2023 – July 2026*

- Delivered strong customer service and communication in fast-paced environments
- Demonstrated problem-solving and adaptability under pressure

ADDITIONAL SKILLS

- Strong analytical and problem-solving abilities
- Effective written and verbal communication
- Team collaboration and time management
- Quick learner with attention to detail
